

# OxyGO<sup>®</sup>

## Keep Going.<sup>™</sup>

The OxyGo<sup>®</sup> family of Portable Oxygen Concentrators gives patients reliable oxygen—without bulky tanks!

- Airline approved
- Up to 5 intelligent pulse flow settings
- Lightweight
- Quiet and discreet

# Is OxyGo® right for your patients?

**ABSOLUTELY!** Thousands of patients love the OxyGo family of Portable Oxygen Concentrators, and so will yours. With their compact size, light weight, and long battery life, you can clearly see how OxyGo outperforms all other concentrators on the market. What makes OxyGo POCs so unique is their extremely high reliability rate, outstanding warranty, and innovative design that reduces unit down-time.

## OxyGo 5 Setting

8.75" x 3.0" x 7.25" 4.8 lbs.

The original OxyGo has 5 pulse flow settings (highest portable O<sub>2</sub> output available today), 1,050 ml output, and up to 10.25 hours\* of battery life—all in a compact, portable unit that weighs less than 5 pounds. OxyGo also has user replaceable batteries and sieve beds that keeps OxyGo in the field working for patients. And with its NEW 5 year warranty, OxyGo is truly designed to Keep Going.

### OxyGo 5 Setting (with single cell battery):

- 4.8 lbs.
- 8.75" x 3.0" x 7.25"
- 1050 ml/min with 5 Pulse Flow Settings
- Up to 10.25 hour battery life\*
- Only 39 dB. at setting 2
- Included Warranties:  
5-years on unit, 1-year on sieve beds & batteries

# 1400-1000

# 1400-1000-16 (system with double cell battery)

\* double cell battery, setting 1

## OxyGo FIT™

5.9" x 2.7" x 7.2" 2.8 lbs.

We named our newest POC the OxyGo FIT because it is going to “fit” into just about all of your oxygen patients’ lifestyles. It weighs just 2.8 pounds and has 3 settings, with 210 ml of oxygen per setting. The OxyGo FIT is well constructed and will operate for almost 3 hours using a standard, user-replaceable battery. It also has an optional larger battery, which will power the unit for up to 5 hours\* and adds less than one-half pound in weight.

### OxyGo FIT (with single cell battery):

- 2.8 lbs.
- 5.9" x 2.7" x 7.2"
- 630 ml/min with 3 Pulse Flow Settings
- Up to 5 hour battery life\*
- Only 40 dB. at setting 2
- Included Warranties:  
3-years on unit, 1-year on sieve beds & batteries

## OxyGo keeps patients going — plus local provider support to ensure they get the best care.

As a family-owned and operated company, we believe the highest quality of care comes from the highest quality product—plus close interaction and monitoring. We provide the highest quality product, but realize that local providers will be able to offer patients much more dedicated attention and service. That is why we do not sell OxyGo or its accessories directly to patients. This "teamwork" mentality clearly makes OxyGo the right choice to keep patients' oxygen needs satisfied, along with giving them the high standard of care they deserve.

OxyGo Portable Oxygen Concentrators are the same patient-demanded, reliable concentrators as seen on TV—backed by the care and attention of the patient's local provider.

## What is a Portable Oxygen Concentrator (POC)?

A POC is a way for oxygen patients to remain ambulatory longer, leading to better health outcomes. Historically, oxygen patients were required to carry heavy cylinders to leave the house, or rely on home filling systems to fill many small cylinders—with the constant fear of running out of time on tanks.

A POC is a medical device that takes the ambient air and concentrates it into medical oxygen. Patients can carry these small, battery-powered devices with them, charging them in the car or swapping out batteries. They can leave the house without the heavy tanks, stigma of an oxygen cart, or worry of running out of oxygen while away from home.

## OxyGo and OxyGo FIT Rated "Best POC" by Industry Experts

OxyGo POCs are the highest-rated, most reliable, and most innovative POCs in the market today—making them the BEST choice for your patients!

- OxyGo FIT and OxyGo units are 2.8 and 4.8 lbs, **allowing patients to remain ambulatory.** Most competitors weigh more.
- Total **oxygen output is 1050 l/min** at setting 5, **the highest on the market.**
- 39 decibels at setting 2—the **quietest on the market.**
- **Battery life of up to 10 hours** on a single charge—allows the patient to have a full day away from home. The DC charger actually charges the battery (not just maintains the current charge) while the unit is being used by the patient.
- OxyGo and OxyGo FIT have the **most sensitive breath trigger point in the market** at (-.12cm H<sub>2</sub>O). These concentrators will effectively saturate most patients while other pulse dose systems with higher trigger points fail to deliver oxygen to the patient. OxyGo is so sensitive, you can attach up to 25 feet of tubing and nasal cannula and it will still trigger a breath. No other POC can make that claim.
- OxyGo units have a **smart alarm system** that not only tells the patient when it doesn't sense a breath—but will keep delivering oxygen until it does.
- Because of the great sensitivity and backup rate of delivering oxygen, **OxyGo is the only manufacturer that states in writing that the patient can use this concentrator 24/7**, which makes it the only truly portable oxygen concentrator on the market.
- **OxyGo units are the easiest to maintain.** Both OxyGo and OxyGo FIT have user-replaceable batteries and sieve beds—so when it's time to change the batteries or replace the sieve beds, the unit can stay with the patient instead of being sent back to the manufacturer for a lengthy repair process.

## Designed to Follow You Anywhere!

OxyGo portable oxygen concentrators (POCs) are lightweight medical devices that can make the medical oxygen your doctor prescribed from the air around you. With OxyGo, you never need to worry about running out of oxygen and you don't need to carry heavy tanks!

OxyGo is different from other POC brands because the units show you exactly how much time you have left on the battery. Plus, you can change the battery easily and use it at the same time—either in the car or at home!

All OxyGo POCs are clinically validated to be used 24/7, so they can supply the medical oxygen you need at home or on the go!

\* Double cell battery, setting 1. \*\* Flow setting 2.
